

# Weight Loss Semaglutide

## OVERVIEW OF SEMAGLUTIDE:

At Boise Biologics we offer proven and powerful weight loss options including semaglutide. Semaglutide is considered by many experts to be the drug of the century. This naturally occurring peptide is providing life-changing weight loss for many people looking to restore their health and feel young again. And the benefits go beyond weight loss. Semaglutide has multiple beneficial biological effects. It has been shown to improve and protect brain function, as well as improve cardiovascular health.

Semaglutide is a biosimilar peptide your body already produces called "glucagon like peptide". This is a therapy that is injected weekly under the skin (or can be taken orally), and tells the brain that you are full, thus decreasing your appetite/food intake, slowing down your stomach emptying and providing beneficial metabolic regulatory effects.
